Video Media Preview and Viewing Log

The following log is used for videos and film media shown by teachers in the Central Kitsap School District. This includes:

1) MPAA-rated movies and programs*

*Items 1 and 2 both require additional forms.

2) Unrated video/film recordings (movies, programs, specials, foreign productions, etc.)*

Teacher____ School Year _____

3) Instructional videos and video clips such as unitedstreamingTM

This log is to be maintained by teachers over the course of the school year to address any parent or administrator question/concern that arises over the showing of video media. All videos and video clips must be previewed in their entirety by a teacher prior to showing to students. When previewing video media, teachers are to consider: the appropriateness for grade level, interest, and maturity of students; correlation to District educational goals, curriculum, Essential Learnings, and Grade Level Expectations; and adherence to District Policy.

School			_				
	nission orm If required, Date Submitted	Video, Film, or Clip Shown (include Clip Number if available)	Source (United Strm, Library, etc.)	Date Pre- viewed	Date Shown	Class and Grade Viewing Video	Viewing Objective

2. I think creating a template that becomes part of the procedures would be helpful. It should include a place for the teacher to indicate the clip shown, previewed, grade and class shown to. It could also include some of the criteria from the list in the procedure (appropriate for grade level, etc). The list should be on-going and at a minimum kept throughout the school year. The purpose will be to be able to address parent questions or concerns raised about any video clips, when they were shown, to whom, etc.
